

Installing FieldTrace on iOS Device

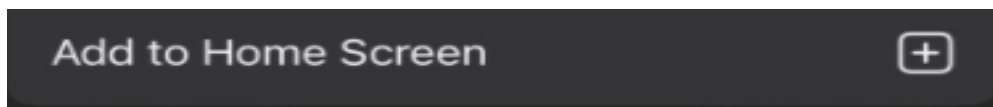

Note: iOS has some restrictions for Progressive Web Applications. This means you will need to use the built-in Safari browser  to install the application. If you are using Chrome this will not be possible.

Using Safari Browser:

1. From the FieldTrace login screen, select the arrow options button as circled in red:

2. Scroll down and select the 'Add to Home Screen' option

3. You should now see the FieldTrace application on your home screen for use.
